WoodMaster LogiApp – DRIVER'S MAUAL

1. Getting Started

1.1 Installation (PWA)

This application is a **Progressive Web App (PWA)**. You do not need to download it from an app store (App Store or Google Play); it is installed directly from your browser.

- **Android (Chrome/Firefox/Edge):**
 1. Open the Chrome browser and go to the application URL.
 2. Tap the menu icon in the top right corner (three dots).
 3. Select "**Install app**" or "**Add to Home screen.**"

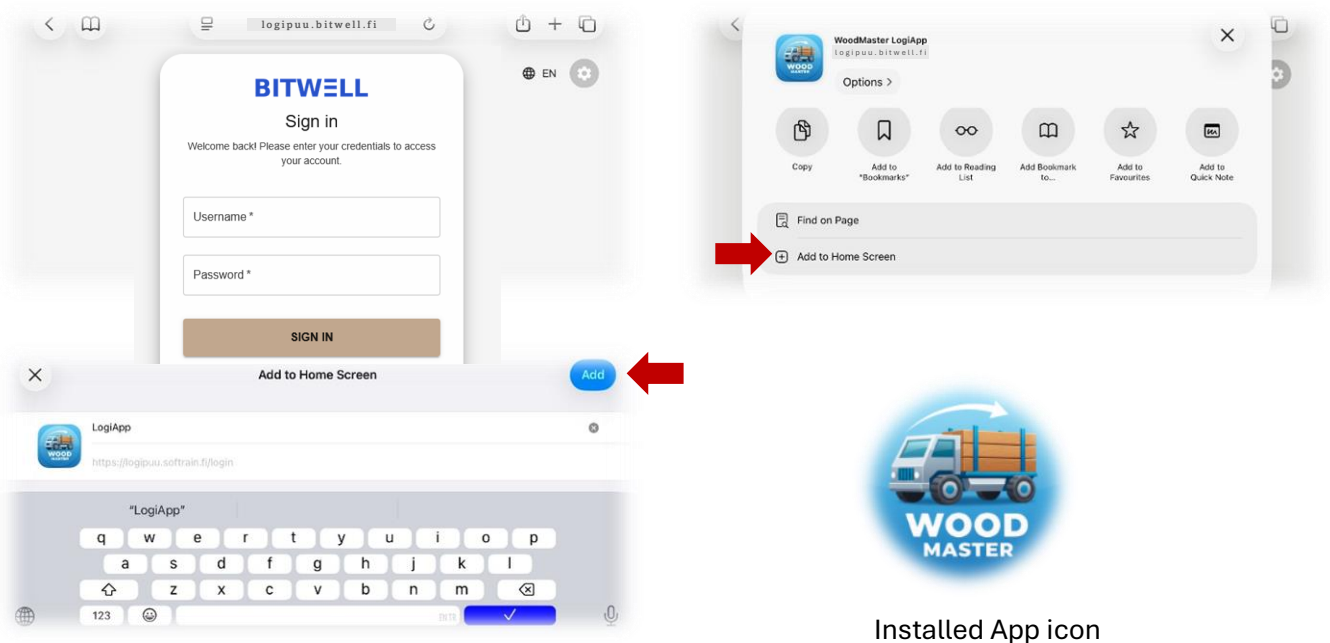

Installed App icon

15.06.2025

- **iOS (Safari):**

1. Open Safari and go to the application URL.
2. Tap the **Share** button (the box with an upward arrow).
3. Scroll down and select "**Add to Home Screen.**"

Installed App icon

1.2 Logging In

1. Open the application from your home screen.
2. Enter the **Username** and **Password** provided by the office.
3. Tap **Sign In..**

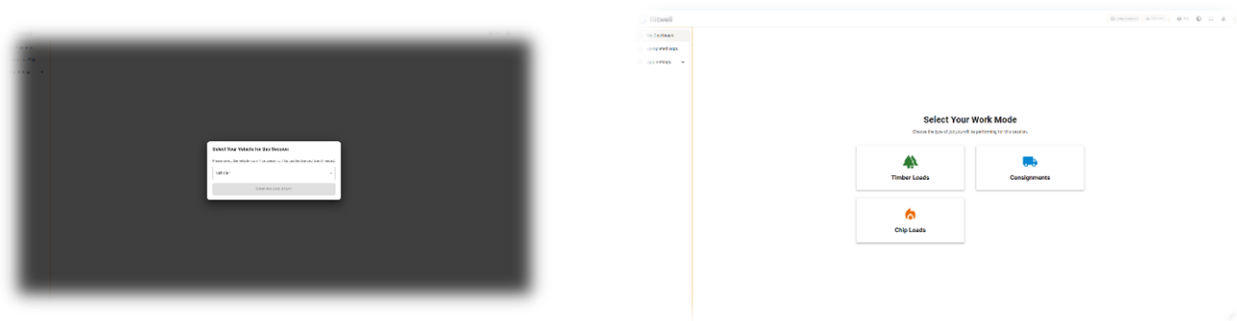

ZZ

1.3 Vehicle Selection

Upon your first login or at the start of a shift, you must select your vehicle.

- Select your vehicle's registration number from the list.
- This ensures that the map displays the specific timber stacks assigned to your vehicle.

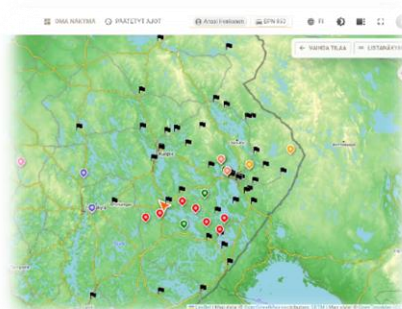

2. Main View (Timber Map)

The application opens by default to the **Timber Map** view.

2.1 Map Management

- **Zoom/Layers (Top Left):** Change the view (Normal, Satellite, or Topographic). You can also hide or show timber stacks and drop-off points.
- **Recenter (Top Right/Bottom Right):** Tap the **Target** icon to center the map on your current GPS location.
 - **Note:** If you move the map manually, "Follow Me" mode pauses. Tap the button again to lock the map to the vehicle's movement.
- **Switch View:** Use the buttons in the top bar to toggle between the **Map View** and **List View**.

2.2 Map Markers

- **Colored Markers:** Timber Stacks (*Puulaanit*).
 - *Red background:* Active and ready for pickup.
- **Flag / Black Markers:** Drop-off Sites (*Purkupaikat*).
- **Navigation Arrow / Red Marker:** Your current location.

3. Workflow: Timber Pickup and Transport

3.1 Creating a Load

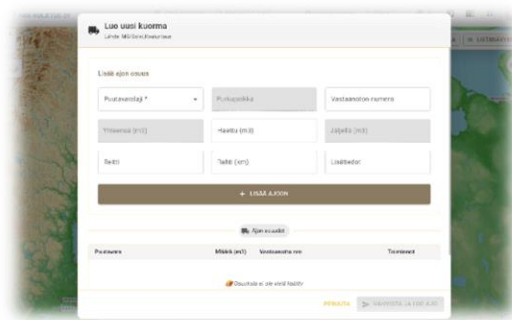

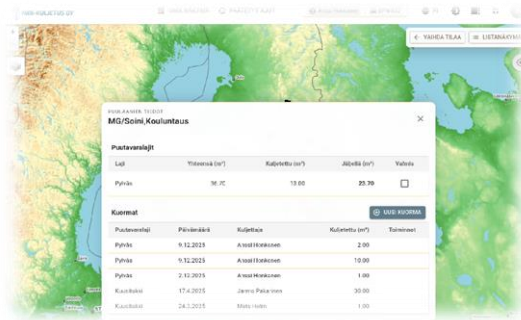

1. Tap a **Timber Stack** marker on the map.
2. The window that opens shows the customer name and quantities. Tap **DETAILS / EDIT**.
3. In the appearing panel, tap the **[+ CREATE LOAD]** button.

4. Fill in the load details:

- **Wood Grade:** Select from the list.
- **Drop-off Site:** Select the destination.
- **Amount:** Enter the transported volume (m^3).
- **"Finished" checkbox:** Check this if the stack is now empty.
 - *Note: If the office adds more wood to the stack later, this selection is cleared automatically.*

5. Tap **[CONFIRM & CREATE TRIP]**.

15.06.2025

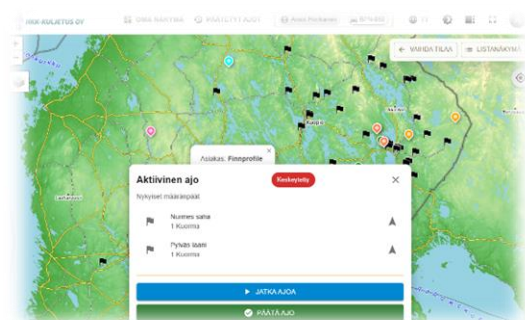

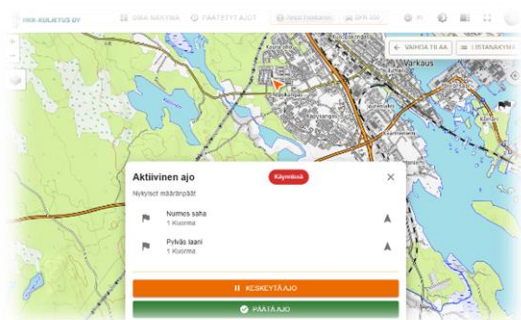

Automatic Start: The trip starts automatically ("In Progress") immediately after the load is created. If not need to press a separate start button.

3.2 Active Trip Management

While a trip is active, the **Active Trip** panel appears at the bottom of the screen.

- **Navigation:** Tap the **Arrow icon** next to the drop-off site name to open Google Maps directions.
- **Pause Trip:** If you take a break, tap [**PAUSE TRIP**].
- **Resume Trip:** When ready to continue, tap [**RESUME TRIP**].
- **Multi-stop Trips:** You can add more loads from other stacks to the same active trip. Simply tap another stack on the map and create a new load.

3.3 Completing a Trip

1. Once you have unloaded the cargo at the destination:
2. Open the **Active Trip** panel (if minimized)

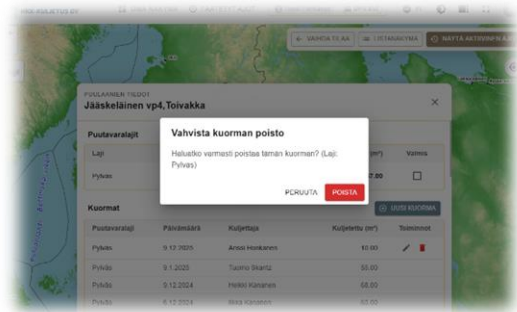

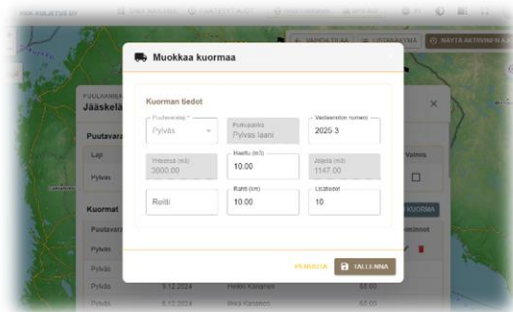

15.06.2025

3. Tap [COMPLETE TRIP].

- The trip moves to the "Completed Trips" history, and the map resets to standby for the next job.

3.4 Editing and Deleting a Load

- Muokkaa: Edit:** You can edit a load (e.g., correct the m^3 amount) *before* the trip is marked as completed. Tap the marker, open details, and tap the **Pencil icon**.
- Delete:** If you created a load by mistake, tap the **Trash can icon**.
 - Note:** When a load is deleted, the red pickup marker disappears from the map, and the original timber stack marker returns.

15.06.2025

4. Workflow: Consignments

If you are transporting poles or other unit goods instead of bulk timber:

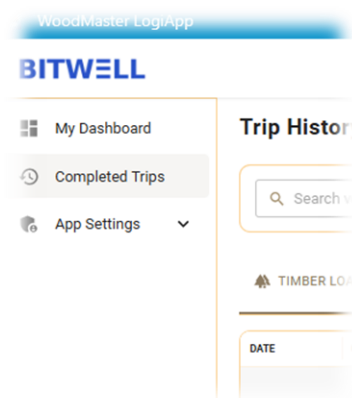

1. Tap **[CHANGE MODE]** in the top left corner.
2. Select **Consignments**.
3. **New Consignment:** Tap the **(+)** button at the bottom center.
4. Fill in customer details and add waybills.
5. Save by tapping **[SEND LOAD]**.

5. Completed Trips and History

In this section, you can review your work history and ensure that completed trips have been recorded successfully.

5.1 Opening History

1. Tap the **Menu icon** (three lines) in the top left corner to open the sidebar.
- 2.
3. Select **Completed Trips**.

5.2 Reviewing Loads

- **Timber Loads:** Displays traditional timber transport (Stacks).
- **Consignments:** Displays pole and unit goods transport (Waybills).
- The list summarizes the date, customer, origin, and destination.

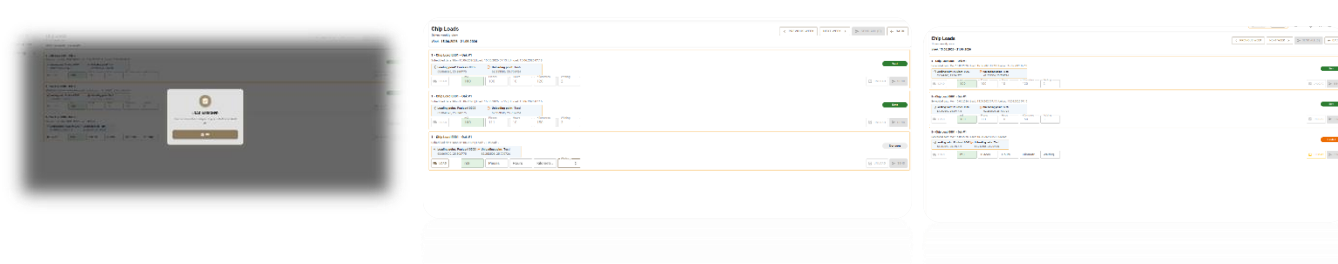

5.3 Trip Details

- [illegible]

6. Chip Transport

- Y-tunnus 3540863-9

7. Chat & Notifications

1. Live Chat System

General Support: Click the **Chat Bubble** at the bottom right corner of any page to open the General Support chat. This allows you to communicate directly with office staff.

Chat History: All your messages are saved. You can continue previous conversations anytime by opening the chat window.

Real-time Interaction: When the office sends you a message, a notification bubble will appear on the Chat icon, and you will receive a pop-up alert.

2. Driver-to-Driver Chat

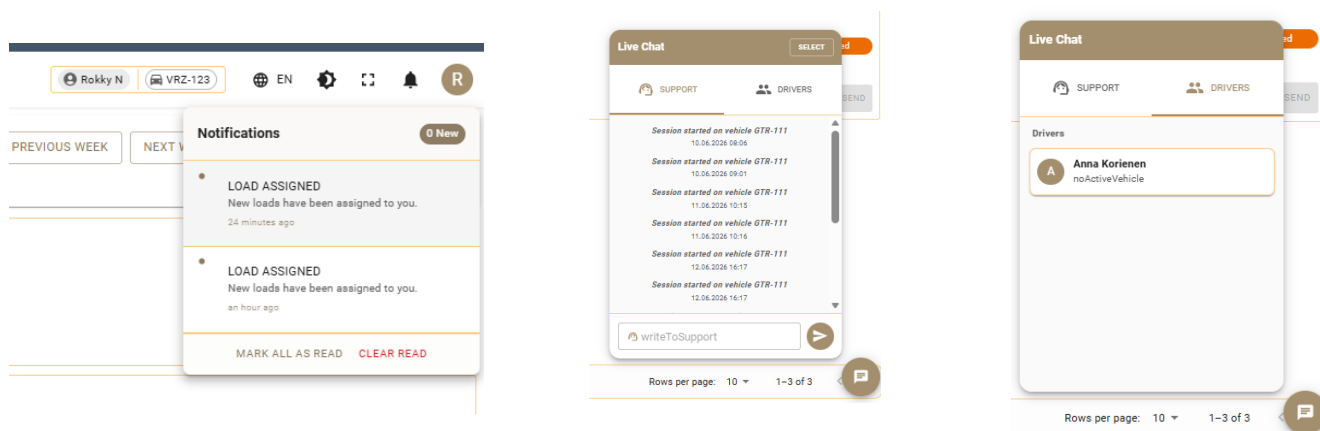

If you need to contact another driver, you can initiate a private chat through the **Contacts** list within the chat interface. This ensures smooth coordination between vehicles on the road.

3. Bell Notifications

The **Bell Icon** (Notification Center) keeps you informed about important updates.

Alerts: You will receive notifications for new load assignments, load removals, or status updates from the office.

Read Receipts: Once you open a notification, it is automatically marked as read. You can view your notification history by clicking the Bell icon at any time.

Luottamuksellinen

8. Application Settings

- **Language:** Tap the language code (**EN/FI**) in the top bar to switch between Finnish and English.
- **Dark Mode:** Tap the **Moon/Sun** icon to change the application's appearance.
- **Map Settings:** Go to **App Settings > Map Settings** to change the size of the markers if they appear too small on your device.

Troubleshooting

- **GPS- GPS Navigation Icon Not Visible: Ensure you have an "Active trip."**
- **GPS is not working:** Please ensure that your mobile browser (Chrome/Safari) has permission to access your device's location services in your phone's settings.
- **Data not updating:** Pull down on the list view or refresh the page in your browser to reload the latest information. The app works best with a stable internet connection, but it will cache data temporarily if your connection is interrupted.
